

Web Page/Answerman report

Many new ideas are being discussed for future improvements to the webpage as well as a revamping of the webpages looks.

Technical issues will be further addressed in Bill Cobbs webmaster report.

A proposal has been put forth to allow strictly controlled advertising on the web page to generate funds for the national coffers and to fund future needs projects.

The answerman email has continued to receive more requests over all previous years, about a 10% increase. Along with our increased awareness has come an increase in spam and virus attacks to the answerman email account, this is up 60% over last year. Steps are being implemented to control and avoid this ever increasing problem.

The majority of emails are requests for either help in finding a lookout job or help in finding and reconstructing an old lookout, i.e. requests for plans / blueprints or parts lists.

It has recently come to our attention that a web search of FFLA no longer brings our assoc to the first spot on the search, that spot is now held by the, Florida foreign language assoc. Since they NOW hold the copywrite to “FFLA” We may have a legal problem once they find out about us.

Respectfully submitted,

Henry Isenberg FFLA Answerman
