

**New Mexico FFLA Chapter Report
2014
February 11, 2015**

Membership: 12

Carry forward: \$388.61

Lookout related information:

-Completed the restoration of Wofford Lookout Cab (a National Register listed site) after many years of neglect. Those that attended the 2013 New Mexico Western Conference may remember that all the windows were busted out and the floor hatch was missing. For a sense of what we started from in the Wofford restoration, to where we are now, see images at:

Before

After

-There have been inquiries and interest in restoring two lookouts here in New Mexico; one being Glorieta Baldy an MC-24 on the Pecos-Las Vegas RD, Santa Fe NF, and the other Black Mountain , and MC-24 on the Black Range RD, Gila NF.

Both are Forest Service inquiries. The two main points of inquiry were “Are there any plans?” and “How did you get the restorations on the Lincoln funded?”

Goals for 2015:

-Submit the outstanding Lincoln Lookouts to the NLR (continuation of last year’s goal).

-Install a mock lookout cab exhibit in the Sunspot National Solar Observatory Visitor’s Center within the Lincoln National Forest’s educational area (continuation of last year’s goal). This project is nearing its start date as plans have been drawn up and components gathered.

-Continue to build a photographic database on the Lincoln National Forest Lookouts (see current database at:

https://www.flickr.com/photos/lincoln_nf_lookouts/sets/)
